## Wireless Pressure DataLogger Up to 60,000 psi w/Data Graphing

### Pressure Logger

- Pressures up to 60,000 psig
- Front Panel Display
- Rechargeable Battery
- Internal Data Logger
- Wireless Monitoring
- Real Time Graphing
- Multiple Transmitter Configurations
- Memory Wrap Around
- Software Configurable
- Programmable Start Time

Will Measure and Record up to 8,191 pressure points. Can be direct connected to your laptop or monitored wirelessly. Graph in real time or simply download the data points and graph them later or both at the same time. The front panel display lets you see what the pressure is at a glance. Simultaneously analyze data from several units or deployments; easily switch to a single data series.

Calibrated Accuracy:  $\pm 0.5\%$  FSR  
Various Pressure Ranges Available  
Engineering Units: User Defined  
Reading Interval: 1 per 30 seconds to  
1 per 12 hours  
RF Carrier Frequency:  $418 \pm 0.075$  MHz  
Direct Connect Baud Rate: 57,600  
RF Baud Rate: 4800  
Range: Line of Sight 120 ft.

### Software Features

Calculate averages, min, max, and standard deviations with the included software. Export data in a variety of common formats or switch directly to Excel with a click of a button. Automatically calculate and store calibration parameters. Easily setup and launch the datalogger with immediate or delayed start, preferred sample rate, and device ID. Time date stamped data readings for easy correlation.
