ANSI API

VALVE SERVICING

This efficient tool allows technicians to bolt up, repair, or replace damaged wellheads without the need for a time consuming and expensive service rig

Ranges and Sizes

- API/ANSI valves with inlet sizes up to 48"
- Pressures up to 60,000 psi.

•
All ANSI/ API valves are inspected, reconditioned, and tested to meet (or exceed) OEM specifications before they leave our facilities.

GREASING

ONSITE FIELD SERVICES

Trust our experienced technicians to provide safe, fast, and efficient onsite valve greasing services.

Benefits of regularly scheduled valve greasing maintenance:

- Minimal disruptions to production
- Assists in the reduction of operating torque
- Protects valves from seizing in position
- Allows valve to seat properly and perform as recommended by manufacturer specifications
- Helps maintain the integrity of well head pressure control equipment
- An important aspect of system maintenance
- Extends the service life of the valve
- Supports the integrity of the system
- 6 fully equipped servicing units across western Canada
- On-line data reporting

INSTRUMENTATION

AND MEASUREMENT SERVICES

- Package installation & tie ins
- Meter run/orifice changers
- Transmitter installations
- SCADA systems
- Control systems & Panels
- Meter Calibrations
- Meter Proving
- Repair & Service
 - Gauges
 - Chemical Pumps
 - Transmitters
 - Dri-flows

YEARS

IN-SITU SERVICING

FIELD VALVE SERVICING

Harness the power of the ATV for your complete remote valve servicing needs.

- Increase longevity & service life of asset
- Valve servicing available on remote locations
- Maintain system integrity
- In-situ function testing
- Commissioning Available • Convenient • Cost saving
 - Valve actuation - Rack & pinion or Pneumatic
 - ANSI/API, Relief Valves

**PROVIDING
SOLUTIONS**

ONSITE PSV Valve Servicing Unit

- Pressure Relief Valve Servicing up to 14"
- Metal lathe
- ANSI/API repair capabilities
- Specialty tooling
- Self-sustaining Power Generation
- 500 pound Overhead hoist
- Self-sustaining air compression up to 3000psi
- Expertly trained technicians
- Sandblasting, Cleaning, Painting & Sealing
- Kings engineered testing bench
- Test, overhaul, repair, and certify

CERTIFICATIONS

- API Q1 • API 6D • ISO 9001:2015 • AQP - 1536
- BC, AB, ON • TSSA QA 05696

E/I & M SERVICES

ELECTRICAL

- Maintenance
- Construction
- Servicing
- Troubleshooting
- Calibration & set up
- Commissioning & start up
- Control panels & assemblies

INSTRUMENTATION

- Package installation & tie ins
- Meter run/orifice changers
- Transmitter installations
- SCADA systems
- Control systems & Panels

MEASUREMENT

- Meter calibrations
- Meter proving
- Repair & service
 - Valves
 - Chemical pumps
 - Gauges
 - Transmitters
 - Dri-flows
- Rental equipment

VALVE SERVICES

- Steam relief valves
- Pressure relief valves (PSVs)
- Pilot operated relief valves
- ANSI/API valve services
- Inline grinding
- Side entry services
- Grinding, gate clamp & machining
- Picker & well head services
- Valve actuation services
- Online Veebase data management

CUSTOM MANUFACTURING

- Construct, repair & alter ASME B31.1 power piping & ASME B31.3 process piping
- Manufacture, repair & alter category A, B, C, D, E, F & H fittings in accordance with CSA B51
